homosexuality, and in response to a direct query regarding his knowledge or suspicion of the truth of the allegation, SUBJECT averred that he has never heard or observed any activity on BARTHE's part that would give credence to the allegations, and questioned how a married man with two children could be so accused.

b. Following a perusal of the lists of potential interviewees released to him, SUBJECT noted that one list (513th list) reflected the names of technical personnel i.e. Engineers, Engine Fitters, etc., and indicated that whenever possible, he would personally contact these individuals, as his own background gives him much in common with them, and he feels that he could obtain the maximum information from the interviews.

c. During a discussion of the approach procedures to be utilized in contacting potential interviewees, SUBJECT concurred in AH's suggestion that he prepare a form letter, under an Ostasiatischer Verein letterhead, to be forwarded by mail to each interviewee prior to making personal contact. Subject letter to contain a brief summary of 8559's activities as a Sinologist and author of publications concerning China, and the nature of his interest in the interviewee as the source of current information to assist in SUBJECT's research and writings. SUBJECT also concurred in a further suggestion that he prepare similar letters of introduction to be provided to his legmen, and to be utilized by them in effecting contacts with interviewees.

d. Sanitized copies of the extracts from the Current Intelligence Requirements List (CIRL) and briefing guides were released to SUBJECT, and a detailed explanation of each was provided by the AH. SUBJECT's excellent command of English obviated the necessity for extensive explanations of technical terminology, and he indicated that would have very little difficulty translating all guidance material into German prior to discussing same with BARTHE.

e. SUBJECT indicated that his parent organization Ostasiatischer Verein maintains a large library of China Mainland maps, and that he will inventory same to select those most suited to operational use. SUBJECT further indicated that he will attempt to ascertain the source of the selected maps, so as to enable purchase of additional copies as needed.

f. SUBJECT was advised that he will be provided with a Standard Telegraphic Code Book and a Gazetteer of China as soon as available. Note: OCA has indicated that he will attempt to obtain these items through OCA channels.

g. SUBJECT stated that he can probably submit his initial reports in English; however, later demands on his time may preclude translations if large volumes of material are generated as results of the efforts of himself and two legmen.
